

Rajiv Gandhi Institute of Technology (Government Engineering College) Kottayam

Department of Civil Engineering

Courses offered in Civil Engineering

- B Tech in Civil Engineering
- M Tech in Transportation Engineering
- M Tech in Structural Engineering and Construction Management (**from this academic year onwards**)

M Tech - Transportation Engineering

RAJIV GANDHI INSTITUTE OF TECHNOLOGY
(GOVT. ENGINEERING COLLEGE, KOTTAYAM)

Department of Civil Engineering

**M. Tech
Transportation
Engineering**

**About the
Course**

**Who
can apply?
B.tech/BE in
Civil
Engineering**

Transportation is the backbone of the economy of any nation. Transportation Engineering is the application of technology and scientific principles to the planning, functional design, operation and management of facilities for any mode of transportation in order to provide for the safe, efficient, rapid, comfortable, convenient, economical, and environmentally compatible movement of people and goods. Though it is a major stream of study in Civil Engineering, this domain is emerging as highly interdisciplinary with the advancements in information and computing technology. The curriculum of the course is designed to equip the PG scholars with expertise in all major areas like Transportation Planning, Traffic Engineering, Highway Materials, and Construction and Management of Pavement. Our laboratories house globally popular software packages and the state-of-the-art equipments in Pavement Engineering. Training programmes in industry-related software and invited lectures and workshops by experts in industry and research are regularly arranged by the Department to keep our graduates abreast with the frontiers of Transport Technology. Project works are frequently undertaken in collaboration with premier national institutes including CSIR-CRRI, NATPAC and IISC Bangalore.

COURSE HIGHLIGHTS

The curriculum includes Courses like

- Traffic Engineering
- Traffic Flow Theory
- Urban Transportation Planning
- Transportation System Analysis
- Intelligent Transportation System
- Transportation Economics
- Highway Analysis and Design
- Pavement Analysis and Design
- Pavement Evaluation and Rehabilitation
- Advanced Highway Materials
- GIS and GPS Applications in Transportation
- Road Safety and Environment

AVAILABLE SOFTWARE

- Transyt
- Tracer
- Mx Road
- Cube
- Systat
- ArcGIS
- Vissim

**Faculty with
15+ years
of experience**

LAB FACILITIES

- Transportation Engineering Lab
- Pavement Engineering Lab
- Traffic Engineering Lab
- CAD Lab

The Lab is well equipped with various equipments like Dynamic Shear Rheometer, Gyratory Compactor, TIRTL, ARRB Roughometer, Rolling Thin Film Oven, Brookfield Viscometer

M Tech – Structural Engineering and Construction Management

Rajiv Gandhi Institute of Technology
(Government Engineering College)
Kottayam

DEPARTMENT OF CIVIL ENGINEERING

**M.TECH IN STRUCTURAL
ENGINEERING & CONSTRUCTION
MANAGEMENT**

APPROVED INTAKE 18

COURSE HIGHLIGHTS

This programme offers advanced courses like Finite Element Analysis, Advanced Design of Structures, Structural Dynamics, Construction Contracts Methods and equipment, Construction Personnel Management, Highrise structures.

WHO CAN APPLY ?

**B.TECH / B.E IN CIVIL
ENGINEERING**

Why M.Tech in SECM?

Acquiring a specialization in Structural Engineering and Construction Management will improve the employability of a Civil Engineer in the industry. It is aimed at exposing the Civil Engg. students to cutting edge knowledge in analysis, design, construction technology and construction management.

Why choose Dept of Civil Engg at RIT?

RIT is ranked fourth in KTU based on the recently published final year B. Tech results.

Dept of Civil Engg

- Accredited by NBA
- Half of the faculty with 15+ years of teaching experience.
- Six of the faculty having Doctoral degree and are approved research supervisors.
- MOUs with KHRI, NATPAC
- involved in research, consultancy and testing.
- Well-equipped laboratories of the Department houses Microprocessor Controlled Universal Testing Machine, UV Spectrophotometer, NDT equipments, Total Stations, Digital Theodolites, Automatic Levels, Ultrasound Concrete Flow Detector, Torsion Testing Machines, GPS, Brookefield Viscometer, Digital Marshall stability equipment, Gyration Compactor, ARRB roughometer, Falling Weight Deflectometer, Triaxial testing machine etc.

Advanced laboratory services

Concrete durability testing laboratory

Pavement Engineering Laboratory

Consultancy and testing done by CE department

Service to society

Participation in Rebuild Kerala Initiative in association with LSGD at Ramankary Grama Panchayat, Alappuzha, involved in soil investigation, Total Station surveying and L/S & C/S preparation of flood affected roads and new roads proposed

Participated in Abatement of Pollution in Manimala River as part of Project “Abatement of pollution in most polluted 21 rivers of Kerala State” floated by Ministry of Water Resources. Involved in water quality sampling and testing, assessment of pollution levels and in preparation of River Action Plan/DPR

MoU's signed with industries

A Memorandum of Understanding (MoU) is signed on 28-02-2022 between Rajiv Gandhi Institute of Technology, Kottayam (RIT) and Kerala Highway Research Institute (KHRI).

A Memorandum of Understanding between the Department of Civil Engineering, Rajiv Gandhi Institute of Technology, Kottayam and KSCSTE-National Transportation Planning and Research Centre, Thiruvananthapuram was signed on 17-01-2022.

**A Memorandum of Understanding between the Centre for Continuing Education,
Dept of Civil Engineering, Rajiv Gandhi Institute of Technology, Kottayam and
Radhe Structorepair Private Limited, Ahmedabad was signed on 29-09-2018.**

Research and development activities

- No. of Research guides – 6
- No. of Research scholars – 20
- Ongoing funded projects – 4

Some ongoing research projects..
